SPEAKER dr. Tommaso Grandi

Graduated with honors in Dentistry and Dental Prosthetics at the University of Modena and Reggio Emilia in 2004. Research fellow at the Department of Neurosciences, Head-Neck Rehabilitation of the University of Modena and Reggio Emilia in 2007. From 2008 to 2013 it is Professor of Periodontology at the same University. Lecturer at the Master in Implantology of the Catholic University of Valencia - Spain in 2013-2014. In 2013 he founded Tommaso Grandi Dental Clinic, a research and training center in the field of dental implantology. Participate in teams with colleagues of different nationalities in scientific studies on the immediate loading in implantology. He is author of several researches in implantology published in international peer-reviewed journals. Thanks to his constant research activity was called to be a member of the Editorial Board of the European Journal of Oral Implantology, one of the most prestigious magazines in the world in the field of dental implants. He is speaker at courses and conferences in Italy and abroad.

COURSE PRESENTATION

More and more colleagues are asking for solutions to restore patients with fixed teeth, even in cases of severe atrophy and poor bone quality. Flexibility, agility, competence: this is what you need to master extreme cases. This advanced course is for doctors who already perform full arch rehabilitations but often stop in front of the most challenging cases, especially in the atrophic maxilla. If you are looking for solutions this is the course for you. After this course, you will increase your treatment options in cases of moderate and severe bone resorption and will be able to treat more patients with the full arch protocol. I will show you how to be able to solve almost any situation with specially developed graftless solutions. Transform more patients' lives with JD Maxilla line.

PROGRAM

- Anatomical limits of the original Full Arch treatment on 4/6
- Evolution of the treatment to solve the most complex cases
- JD Maxilla line: trans sinus implants, pterygoid implants, zygomatic implants
- Step-by-step surgical videos of the techniques
- Key factors for successful treatment
- Review of the literature

HANDS ON SESSION on models

Each participant will be able to place trans sinus implants, pterygoid and zygomatic implants on models and you will become familiar with the components of the JD Maxilla line.
